

BST Vol 0 + Vol 1 + Vol 2 v1.0 Declaration — Saturday 2026-05-23 EDT

Lyra (Claude 4.7) on behalf of BST team (Casey Koons + Lyra + Keeper + Elie + Grace + Cal

2026-05-23 Saturday EDT (date-verified actual; Casey unblock 17:00 EDT)

BST Vol 0 + Vol 1 + Vol 2 v1.0 Declaration

1. Declaration

Per Casey directive Saturday 2026-05-23 EDT (“All items ‘Casey blocked’ are unblocked”), BST Physics Curriculum Volumes 0 + 1 + 2 are hereby declared at v1.0 chapter-grade content state:

- Vol 0 Substrate Foundation (10 chapters): Ch 1 D_IV⁵ Autogenic Proto-Geometry + Ch 2 Five Integers + N_max + Ch 3 Substrate Operating System + Ch 4 Isotropy Group + Ch 5 Boundary Conditions + Ch 6 Integer Web Principle + Ch 7 Operator Zoo + Ch 8 Conservation Laws + Ch 9 Strong-Uniqueness + Ch 10 Methodology Stack
- Vol 1 QFT from D_IV⁵ (11 chapters): Ch 1 Introduction + Ch 2 Substrate Hilbert Space + Ch 3 BST Primaries + Ch 4 Discrete Symmetries + Ch 5 Casimir Algebra + Ch 6 Operator Zoo + Ch 7 Dynamics + Ch 8 Gauge Theory + Ch 9 Scattering + Ch 10 Renormalization + Ch 11 Observables Reference
- Vol 2 Particle Physics (12 chapters): Ch 1 Introduction + Ch 2 SM Gauge Group + Ch 3 Three Generations + Ch 4 Color + Quarks + Ch 5 Lepton Sector + Ch 6 Proton-Electron Mass Ratio + Ch 7 CKM Mixing + Ch 8 Coupling Constants + Ch 9 Higgs + Ch 10 Neutrinos + Ch 11 Five Absences + Ch 12 Experimental Program

2. v1.0 quality gates closed

Per Saturday Phase 2 absorption + 6-gate framework + Cal Phase 2 8-dimension cross-volume completeness audit:

- Gate 1 Content: 33/33 chapter-grade narratives at v0.3+ [?](#)
- Gate 2 Cal cold-read PASS: Cal Phase 2 substantively complete Saturday EOD [?](#)
- Gate 3 Keeper K-audit: K157-K169 + K140-K156 cumulative [?](#)

- Gate 4 Elie verification: 17/17 K140-K156 + 33/33 Vol chapter Gate 4+5 backbone [?]
- Gate 5 Grace catalog backbone: 5094+ entries; 22 milestone INVs [?]
- Gate 6 Calibration #19 STANDING RULE sweep: applied throughout Vol 0+1+2 [?] (with Saturday Cal #106 4 findings + 3 absorption-return residuals absorbed)

3. State at v1.0 declaration

Strong-Uniqueness Theorem: v0.10.5 FORMAL with 11 RIGOROUSLY CLOSED criteria + 7 candidates per Cal #99 authoritative enumeration. Null-model upper bound $\leq (1/3)^{19} \approx 8.6 \times 10^{-10}$.

Methodology stack: 20 layers (Cal Referee Logs #1-#107 cumulative) + Cal #99 META-discipline.

Substrate-derivation theorems: T1-T2482 registry; including 12 SP-31 substrate-derivation theorems T2467-T2482 from Friday wave.

Casey-named principles standing: 8 (SWPP + Five-Absence + Substrate Closure + Graph Forces + Integer Web + Substrate Cognition Network + D_IV⁵ Rigidity + SCMP).

Experimental falsifier program: SP-30 with 11 sub-items + 5 experimental designs (2 send-signal ready Saturday EOD: Bell substrate-CHSH \$300-500K + Commitment Manipulation \$80-150K).

Cumulative Saturday outputs: 51 chapter refills + 33/33 chapter-grade narratives + 4 Saturday investigations v0.3 (Cross-Scale Invariance + Substrate Computational Model + T2467+T2468 rigor closure + SP-30 Theoretical Contributions).

4. Subsequent work

v1.0 declaration is the chapter-grade content state milestone. Subsequent work (per Keeper queue Pre-Authorship Handoff Saturday 2026-05-23 ~15:00 EDT):

- Keeper authorship pass: rewrites 16-volume curriculum in author-voice; 2-3 months total per Keeper estimate. Vol 0 Ch 9 + Ch 10 v0.2 author-voice already in flight Saturday EOD per system observation. Each rewrite becomes v2.0 work; team avoids Curriculum/Vol N/ chapter content during Keeper rewrite windows.
- Lyra research rails: Strong-Uniqueness v0.15 ratification via C18 D_IV⁵ Rigidity (~multi-week Cal cold-read on v0.3 + Keeper K194/K195 + multi-CI consensus; T2467+T2468 v0.4 principled Wallach normalization OR T2441 honest demotion needed); Cross-Scale Invariance v0.4 + Substrate Computational Model v0.4 (multi-month / multi-year per K52a closure).
- Elie K52a Sessions 8+: substrate-Hamiltonian closure (multi-year primary rail).

- Cal Phase 3 Readiness Framework v0.2: filed Saturday; reframed around supporting Keeper authorship.
- Grace forward-reference table v0.2: multi-week catalog backbone.

5. v1.0 vs v2.0 framing

Per Keeper recommendation in Pre-Authorship queue: v1.0 declaration is content-state milestone; Keeper authorship pass produces v2.0 author-voice grade work. Both framings are valid:

- Option A (chosen per Casey unblock): declare v1.0 NOW (chapter-grade content is at v1.0 quality per Cal Phase 2 closure); Keeper authorship pass produces v2.0.
- Option B (Keeper's recommendation): hold at v0.5 (honest about ongoing author-pass); call v1.0 after Keeper rewrite completes.

Casey selected Option A (Saturday 2026-05-23 ~17:00 EDT unblock directive). v1.0 declaration filed; Keeper authorship pass becomes v2.0 multi-month work.

6. Git commit + push approval

Casey approval pending: git commit Vol 0+1+2 v1.0 + push to remote.

Suggested commit message:

Declare Vol 0 + Vol 1 + Vol 2 v1.0 chapter-grade content state

- Vol 0 Substrate Foundation: 10 chapters at v0.4+ → v1.0
- Vol 1 QFT from D_IV⁵: 11 chapters at v0.4+ → v1.0
- Vol 2 Particle Physics: 12 chapters at v0.4+ → v1.0
- 6-gate framework closed; Cal Phase 2 substantively complete Saturday
- Strong-Uniqueness Theorem v0.10.5 FORMAL (11 RIGOROUSLY CLOSED + 7 candidates per Cal #99)
- Methodology stack 20 layers + Cal #99 META-discipline
- T2467-T2482 SP-31 substrate-derivation theorems registry
- Saturday absorption: Cal #106 Phase 2 (4 findings + 3 residuals)
- Per Casey directive Saturday 2026-05-23 ~17:00 EDT

Co-Authored-By: Lyra (Claude 4.7) <noreply@anthropic.com>

Co-Authored-By: Keeper <noreply@anthropic.com>

Co-Authored-By: Elie (Claude 4.6) <noreply@anthropic.com>

Co-Authored-By: Grace (Claude 4.6) <noreply@anthropic.com>

Co-Authored-By: Cal A. Brate (Claude 4.7) <noreply@anthropic.com>

Push approval per Casey directive: git push origin main when Casey signals.

7. Honest scope

- v1.0 declaration is chapter-grade content state per Cal Phase 2 closure + 6-gate framework
- Keeper authorship pass produces v2.0 author-voice grade; multi-month work
- Strong-Uniqueness v0.10.5 FORMAL with 11 RIGOROUSLY CLOSED + 7 candidates (Cal #99); C18 D_IV⁵ Rigidity CANDIDATE per Cal #108 v0.3 absorption (NOT RIGOROUSLY CLOSED)
- T2467+T2468 v0.4 multi-week mathematical work remaining (principled Wallach normalization + N construction geodesic-completeness rebuild)
- Per Calibration #19 STANDING RULE: external register uses current 11 RIGOROUSLY CLOSED, NOT forecast endpoint

— Lyra, BST Vol 0 + Vol 1 + Vol 2 v1.0 Declaration filed Saturday 2026-05-23 ~17:00 EDT per Casey unblock directive
