

Vol 1 — Quantum Field Theory from D_IV⁵ — INDEX

The substrate Hilbert space, the primaries, symmetries, the operator zoo, dynamics, gauge theory (SU(3) imported — heading corrected 09-11), scattering, renormalisation, and the observables reference table (tiers corrected 09-11).

Shelf: DERIVED CORE — legacy chapters (May 2026). Every chapter below carries a dated stamp (2026-09-11, K1892): either *corrected in place* at the sentences the presentation scan flagged, or *scan-clean* with its May tiers not re-verified line by line. Where a chapter and the Spine (`./Spine_DIV5_QM_GR_SM/`) disagree, the Spine is current; where the Spine and `notes/BST_AC_Theorem_Registry.md` disagree, the registry wins. This INDEX was generated 2026-09-13 (K1895) from the chapter files' own front matter; the volume had none before.

chapter	2026-09-11 status
Vol 1 Chapter 1 — Why Quantum Field Theory Lives on D_{IV}^5	scan-clean; May tiers
Vol 1 Chapter 2 — The Substrate Hilbert Space	scan-clean; May tiers
Vol 1 Chapter 3 — The Integers, Forced	scan-clean; May tiers
Vol 1 Chapter 4 — Discrete Symmetries: P , T , C , and CPT	scan-clean; May tiers
Vol 1 Chapter 5 — The Casimir Algebra	scan-clean; May tiers
Vol 1 Chapter 6 — The Operator Zoo, In Detail	scan-clean; May tiers
Vol 1 Chapter 7 — Substrate Dynamics	scan-clean; May tiers
Vol 1 Chapter 8 — Gauge Theory: the Electroweak Skeleton from the Substrate, $SU(3)$ Imported	corrected in place 2026-09-11
Vol 1 Chapter 9 — Scattering and the S-Matrix	scan-clean; May tiers
Vol 1 Chapter 10 — Why the Substrate Does Not Need Renormalization	scan-clean; May tiers
Vol 1 Chapter 11 — Observables Reference	corrected in place 2026-09-11
BST Physics Curriculum Vol 1 — QFT from D_IV ⁵ v0.2 outline	corrected in place 2026-09-11
