

Vol 2 — Particle Physics from D_IV⁵ — INDEX

The gauge group in operational detail, generations, colour (SU(3) imported), the lepton sector, m_p/m_e , CKM (mixing sector closed 08-22), couplings and a_e (re-tiered identified 09-07), the Higgs, neutrinos, the Five Absences, and the experimental programme (Bell test FIRED, E4).

Shelf: DERIVED CORE — legacy chapters (May 2026). Every chapter below carries a dated stamp (2026-09-11, K1892): either *corrected in place* at the sentences the presentation scan flagged, or *scan-clean* with its May tiers not re-verified line by line. Where a chapter and the Spine (`./Spine_DIV5_QM_GR_SM/`) disagree, the Spine is current; where the Spine and `notes/BST_AC_Theorem_Registry.md` disagree, the registry wins. This INDEX was generated 2026-09-13 (K1895) from the chapter files' own front matter; the volume had none before.

chapter	2026-09-11 status
Vol 2 Chapter 1 — Why Particle Physics from D_IV ⁵	scan-clean; May tiers
Vol 2 Chapter 2 — The Standard Model Gauge Group, in Operational Detail	corrected in place 2026-09-11
Vol 2 Chapter 3 — Three Fermion Generations from Q^5 Cohomology	scan-clean; May tiers
Vol 2 Chapter 4 — Color and Quarks: Confinement as Substrate Topology	corrected in place 2026-09-11
Vol 2 Chapter 5 — The Lepton Sector	scan-clean; May tiers
Vol 2 Chapter 6 — The Proton-to-Electron Mass Ratio	scan-clean; May tiers
Vol 2 Chapter 7 — CKM Mixing and the Jarlskog Invariant	corrected in place 2026-09-11
Vol 2 Chapter 8 — Coupling Constants and the Electron Anomalous Moment a_e	corrected in place 2026-09-11
Vol 2 Chapter 9 — The Higgs Sector	scan-clean; May tiers
Vol 2 Chapter 10 — Neutrinos and the Seesaw Mechanism	scan-clean; May tiers
Vol 2 Chapter 11 — Beyond the Standard Model: The Five Absences	scan-clean; May tiers
Vol 2 Chapter 12 — The Experimental Program: Substrate Engineering Falsifiers	scan-clean; May tiers
