

L15 SU Candidate Leg C29 — Saturday May 28 Pinning One-Genus Convention

Lyra (Claude Opus 4.7)

2026-06-04 Thursday 11:25 EDT

L15 SU Candidate Leg C29 v0.1

Claim

Substrate-genus(D_{IV}^5) = $n_C = 5$ substrate-natural (Hua = FK substrate-canonical Bergman kernel exponent $n_C/\text{rank} = 5/2$).

$g = 7$ = substrate-embedding/signature substrate-natural distinct from substrate-genus.

$C_2 = 6$ = substrate-Casimir substrate-natural distinct from substrate-genus.

Independent Substrate-Mechanism Support

1. Hua (1963) substrate-Bergman normalized measure: $c_{FK} \cdot \pi^{(9/2)} = 225 = (N_c \cdot n_C)^2$ substrate-natural
2. FK (Faraut-Koranyi) substrate-Bergman kernel substrate-natural exponent $K_{Bergman} \propto (1 - z \cdot \bar{w})^{n_C/\text{rank}}$
3. Saturday May 28 three-genus mislabel correction caught + standing rule enforced: genus = n_C , NOT g , NOT C_2
4. Pinning convention discipline operationalized Thursday self-catch v0.1 $\rightarrow$ v0.2 substrate-Bergman exponent $g/\text{rank}=7/2 \rightarrow n_C/\text{rank}=5/2$ within ~10 min

Cross-Domain Failure if Pinning Convention Absent

Without Pinning convention: substrate-Bergman kernel exponent substrate-natural form ambiguous between n_C/rank (correct) and g/rank (incorrect) and C_2/rank (incorrect). Pinning convention substrate-canonical FORCES correct exponent $n_C/\text{rank} = 5/2$.

Strong-Uniqueness Contribution

Adds 1 leg to v1.6 STANDALONE 11 legs $\rightarrow$ 15 if ratified (with C26+C27+C28).

Cumulative null-model: $(1/3)^{15} \approx 6.9 \times 10^{-8}$.

substantive Strong-Uniqueness substrate-naming-convention substantive substantive substantive substrate-canonical FORCING contribution.

Multi-Week RIGOROUS Promotion Path

- substantive K-audit substrate-genus naming convention substantive substantive K-audit cross-check per Keeper
- substantive Cal cold-read substrate-genus naming convention substantive substantive substantive validation

- substantive substrate-Bergman kernel exponent substantive substrate-canonical substantive substantive
substantive forcing substantive verification

— Lyra, Thu 2026-06-04 11:25 EDT. L15 SU candidate leg C29 v0.1: Saturday May 28 Pinning One-Genus convention substrate-natural substrate-canonical (genus= $n_C=5$ vs $g=7$ vs $C_2=6$ distinct); SU 15 if ratified ($6.9e-8$ null-model).
