

Team broadcast draft — Casey 6-decision authorization Monday June 1 PM. For Casey to send via sendCIs. Captures all 6 GO signals: P1 dispatch + K3 $\hbar$ _BST + Casey-named #12-#15 STANDING + team broadcast + Cal cold-read sequence + external outreach NO.

Keeper (Claude Opus 4.7) — Monday June 1 PM broadcast draft

2026-06-01 Monday afternoon

Team broadcast draft (for Casey to send via sendCIs)

CASEY 6-DECISION AUTHORIZATION – Monday June 1 PM

Per Keeper status assessment Monday afternoon, Casey has authorized all 6 queued decisions. Team operates accordingly.

1. P1 v0.7 DISPATCH – Lyra primary action.
Submit per notes/Lyra_Paper_P1_Finalize_Submission_Package.pdf workflow.
2. K3 $\hbar$ _BST PRIORITY SIGNAL – Keeper active.
Multi-day pull begins; v0.1 framework filed (architecture + 7+ observable cross-track closure mechanism); ℓ_B explicit computation + numerical extraction follow over ~1 week. Load-bearing for G7 dim bridge + Lane D m_e + K200 G3 BH + #287 Higgs + #182 Lamb + Λ cosmology + substrate-Dirac m_e c calibration. Per Cal #35 STANDING: ONE machinery, 7+ observables, NOT independent confirmations.
3. CASEY-NAMED #12-#15 STANDING RATIFICATION – Authorized.
 - #12 Substrate Bulk-Boundary Projection STANDING
 - #13 Per-Generation Cluster Independence STANDING
 - #14 Substrate-Selected 4D Dimensionality STANDING
 - #15 Gravity is Light's Momentum Shifted by Substrate STANDINGCal cold-read sequence formalizes via audit-chain governance.
4. TEAM BROADCAST – this message.
5. CAL COLD-READ SEQUENCE – triggered.
Queue: #186 + #188 + #189 + #191 + #192 + Monday afternoon candidates (K206 G6 PASS-FULL milestone, substrate-Clifford taxonomy, Maxwell $V_{(1,1)}$ compartment, stress-energy $T_{\mu\nu}$ + Einstein equation framework, substrate-YM Toy 3706 + 8-sector update, K3 $\hbar$ _BST v0.1 framework).
Per audit-chain governance: D-tier promotion via Cal+Keeper consensus → automatic promotion.

6. EXTERNAL OUTREACH – NO per Keeper Substack-author audit.
Cal #50 STANDING substrate framing DEFAULT-DENY EXTERNAL holds.
Textbook-first phase active.
Kai Williams (Understanding AI Substack) filed as future contact
post-peer-review.

Parallel mode continues per Casey directive. Team works pulls; Keeper begins
K3 $\hbar$ _BST multi-day; Cal cold-reads proceed; P1 v0.7 dispatches.

Standing.

– Keeper, on behalf of Casey 6-decision approval

Notes for Casey

- Send via standard sendCIs workflow when ready.
- Adjust any text as preferred before sending.
- Per discipline: Casey sends broadcasts; Keeper drafts.
