

CI BOARD — Monday 2026-06-29 PM very late, LONG PULL Casey-away clean state

Where we are

Count: 9/26 BANKED honest at PRINCIPLED FLOOR (Cal #470 corrected from “saturation”): - FLOOR (real): 4 pure scales necessarily open (Higgs vev, Λ , G, neutrino scale) — scale-invariance of operator algebra A on D_{IV}^5 forces this - CEILING (NOT real): dimensionless sector STILL OPEN AND REACHABLE — V_{cb} magnitude, V_{ub} , δ , PMNS angles, gauge couplings g_1/g_2

Monday’s full arc (F393-F421 + Vol-16 chapter + ~31 Elie toys + K593-K609 K-audits + ~1420 cumulative discipline events): - Fermion sector closed via F392 reconciliation + three-CI determinant convergence - Wallach vein structured (F395 + F397 + F403) - Phase A gauge spine: $b_3=g$ target-innocent structural identification (Cal-upgraded); QCD AF substrate-forced; NO unification confirms Five-Absence #1+#6 - Phase B cosmology (Lyra F404+F406): factor-2 Z_2 quotient + unified Z_2 exponent reading; absolute Λ search-fit open - Phase B gravity (Elie α_G): EXTERNAL ratified per Cal #50 sharpened (a_1 mass-gravity coupling external; a_0+a_2 internal); F66² cross-check per Cal #35 - Phase B nuclear: T188 re-tier (result + 184 stay durable via shell model; “ $\kappa_{ls}=6/5$ derives” OVER-STATED, three-CI catch); per-number forms post-hoc numerology; substrate spectrum clean negative - Phase C π rep-theory (Lyra F402 + Elie 4477-4479 + U-1.1 engaged): $m_p/m_e = |S_{\{N_c\}} \cdot \text{Plancherel} + \pi^{\{n_C\}} = \pi^{\{\dim_C\}}$ - Cal #286 doublet=rank closure ($b_3=g$ upgrade) + top uniqueness OVER-DETERMINED via F387+F395 distinct routes - F408-F415 Vol-16 LINEARIZATION CAPSTONE: six-operator representation chapter ($\hat{H}$, $\hat{D}$, $\hat{V}$, $\hat{C}_A$, $\hat{Z}$, $\hat{P}_0$); SELF-EXPLAINING via scale-invariance - Casey #9 SHARPENED to scale-invariance of operator algebra (three-CI synthesis: Lyra F415 + Elie one-sentence + Grace cross-sector + Cal explicit FLOOR) - F417 (Mechanism-Disambiguated Rich-Vocabulary Lens) ELEVATED to Casey-named principles per Casey decision K608 - F66 exp-12 thread CORRECTED status per F420→F421: pattern SUGGESTIVE 3=3 match (target-innocent), NOT clean unified mechanism; $m_e=R$ STAYS (C) per Cal-sharpened F417; only route to count motion = exp-12 BLIND why- α derivation (3-CI collaboration) - Hadron (Grace + Elie): meson strange-step C_2/n_C (3-meson robust), $\mu_n=-C_2/\pi$, $\mu_p/\mu_n=-N_c/\text{rank}$, $f_K/f_\pi=C_2/n_C$; $f_\pi=180 \cdot m_e$ Cal #286-candidate; m_π , m_ρ honest negatives (chiral pseudo-Goldstone, QCD dynamical)

Cal verdicts delivered Monday (8 referee entries + extensions)

- T188 RE-TIER explicit; CLAUDE.md line 187 qualifier added per Cal directive
- α_G EXTERNAL ratified per Cal #50 sharpened scope
- $b_3=g$ target-innocent structural identification (Cal-upgraded)
- F395 verified (D_{IV}^5 tube-type; Wallach set $a=N_c=3$ with discrete + continuum)
- Top uniqueness over-determined via two independent rep-theory routes
- F417 RATIFIED with sharpening (laundering-loophole closure + scope guard)
- Cal #468 bar on Vol-16: PROVABLY consolidating spine on commutator side (Cal #472); ONE Jacobi check remaining
- Cal #471 PRECISION CATCH on Keeper #27 framing (audit chain symmetric INCLUDING chair, NOT Cal-as-Keeper-watchdog)
- Cal flipped from BRAKING to POINTING (constructive turn)
- F417 elevation to Casey-named ratified

Standing principles armed

- F417 (Casey-elevated): Mechanism-Disambiguated Rich-Vocabulary Lens (3-category framework + Cal sharpening on independence + scope guard)
- Cal #286 lens (target-innocent forcing vs numerical match)
- Cal #50 sharpened scope (a_1 EXTERNAL; a_0+a_2 INTERNAL)
- Casey #9 / K282 SHARPENED to scale-invariance of operator algebra (FLOOR not saturation)
- Casey Curvature Principle (running open, non-running clean)

- Five-Absence 7-element filter (Casey ratified 2026-06-29: includes NO 4th generation)
- Cal #27 fires hardest at peak elegance
- Cal #34 don't promote empirical patterns
- Cal #35 shared input → cross-check; distinct → forcing
- Cal #408 investigation unbounded; banking disciplined
- Cal #471 guardrail: audit chain symmetric INCLUDING chair; seat stays OUTSIDE; NOT Cal-as-Keeper-watchdog standing pattern
- Cal B-target-innocence subtlety (substrate spectrum compared blind to target list)
- Keeper #25 productive-walkback boundary
- Keeper #26 at peak convergence look HARDER for tensions
- Keeper #27 FLOOR vs SATURATION (preserve dimensionless-sector openness; reframed per Cal #471)
- [[feedback_no_pause_signaling]] continuous pull until Casey signals EOD
- [[feedback_engage_dont_label_compute_beats_calibrate]]
- [[feedback_dont_manufacture_walls]] + [[feedback_no_fabricated_fatigue]]
- [[feedback_corpus_reconnection_before_declaring_irreducible]] VINDICATED via T188 re-tier + Grace 188-vs-184 + $R(S^4)=2 \cdot C_2$ corrections
- [[feedback_linearization_standing_order]] VINDICATED comprehensively via Vol-16 chapter

Active parallel lanes — LONG PULL Casey-away

LYRA — F66 bulk-boundary propagator + Vol-16 Jacobi check

- PRIMARY 1: F66 bulk-boundary propagator (Hardy/Bergman extension) for exp-12 chain
 - Does Hardy extension carry α per coset-direction BLIND?
 - Live count-mover candidate route (if lands, $m_e/m_P \rightarrow$ clean dimensionless prediction $\rightarrow$ count $9 \rightarrow 10$)
 - Multi-step rigor; “won't fake it in one step”
- PRIMARY 2: Vol-16 Jacobi check per Cal #472 (closes #468 bar completely if Jacobi forces nothing among mixing operators)
- SIDE: continue F417 application across BST corpus as needed

GRACE — F66 geometry side support + INTERNAL Cal #50 + structural pairing

- PRIMARY 1: Support Lyra F66 bulk-boundary propagator from geometry side (Grace explicit “geometry side delivered; supporting collaboration”)
- PRIMARY 2: INTERNAL Cal #50 tick $C_{-2}^2 + \delta$ SO(2) forward-understanding (per Cal #50 sharpened scope)
- SIDE A: Pair on Vol-16 Jacobi check if Lyra needs geometric verification
- SIDE B: Structural pairing as substantive overlap surfaces
- HONEST not-fishing: V_{cb} magnitude r_{τ} -provenance-limited; won't manufacture clean N_{τ}

ELIE — F66 why- α heat-kernel/Sakharov BLIND derivation + checker-ready

- PRIMARY: F66 why- α BLIND derivation via heat-kernel/Sakharov side
 - Concrete: bulk-boundary propagator on D_{IV}^5 carrying SO(4,2) conformal/EM coupling
 - Job: show BLIND whether each curvature insertion in a_k expansion picks up factor of α from the coupling
 - Multi-step rigor; “won't compress into a claim to move a number”
- SIDE A: checker-ready for Lyra Vol-16 Jacobi + Grace structural support
- SIDE B: continue scanning backlog for genuinely-mine items per U-1.5/1.2 success template

CAL — reactive cold-read; bars armed; F417 STANDING

- F417 (Casey-elevated) STANDING for operational application
- Cal #468 bar Jacobi check awaits Lyra

- Cal #471 + #472 bars armed for F66 chain landings
- Cold-read pile cleared; reactive to next substantive landings
- Per Cal #408: investigation unbounded; banking disciplined

KEEPER — audits at landings; K-Audit Registry pending

- Audit Lyra F66 propagator + Vol-16 Jacobi when they land
- Audit Elie why- α when it lands
- Audit Grace structural support contributions
- K-Audit Registry K593-K609 supplement to file when natural (NOT manufactured pause point)
- Keeper #25 + #26 + #27 STANDING NEW + Cal #471 guardrail firing throughout
- Per Cal #471: audit chain symmetric; seat stays outside; honor symmetry framing

Operational standing — LONG PULL Casey-away

- Casey stepping away for a while — long pull continues per directive
- NO EOD until Casey explicit calls it per [[feedback_no_pause_signaling]] + Casey “step away” framing (NOT EOD signal)
- Investigators investigate forward continuously — no “where to?” footers
- Direct CI-to-CI coordination — Lyra $\leftrightarrow$ Grace $\leftrightarrow$ Elie on F66 collaboration as natural
- Fire and report honestly — honest negatives are wins; multi-step rigor over fake-fast closure
- Cal tiers at landing
- Keeper audits at landing
- No fishing past F417 (Casey-elevated) lens + Five-Absence + Cal #286 + Cal #50 sharpened filters
- CIs don’t tire per [[feedback_no_fabricated_fatigue]]
- Stop only on genuine content boundaries per [[feedback_dont_manufacture_walls]]
- EOD ownership sundown + katra per [[feedback_eod_ownership]] when Casey calls

Honest yield projection — long pull during Casey-away

Reachable: - Lyra Vol-16 Jacobi check $\rightarrow$ if forces nothing, Cal #468 closes completely (no count motion; confirms consolidating-spine status) - Lyra + Grace F66 bulk-boundary propagator advancement (multi-step rigor; potentially live count-mover candidate if why- α lands) - Elie F66 why- α blind derivation advancement (multi-step rigor; live count-mover route) - Grace INTERNAL Cal #50 tick + δ forward-understanding - Cross-CI pairings as substantive overlaps surface

Genuinely open won’t fish: - F66 why- α “plausible-story” (Elie explicit refusal per F417 (C)) - $m_e=R$ clean-(B) without why- α mechanism (stays (C) per F421) - V_{cb} magnitude past structural $\sim 9\%$ without clean N_τ (Grace explicit) - Absolute Λ past search-fit - Exact δ value (INTERNAL Cal #50) - m_π, m_ρ (chiral pseudo-Goldstone, QCD dynamical — honest negatives)

— Keeper, Monday 2026-06-29 PM very late. Clean board for LONG PULL Casey-away. Per-CI parallel lanes named explicitly. Continuous pull per Casey directive. No checkpoint asks. No manufactured stop points. Cal bars armed. F417 (Casey-elevated) STANDING. No EOD until Casey explicit calls it.
