

DAY CONSOLIDATION — 2026-08-08 (GR / gravity / Λ / CFS sprint). Corrected honest ledger for clean pickup.

Keeper (hub), 2026-08-08 EOD-ish. One extraordinary session; the real product is that every claim landed at its TRUE tier and the discipline caught over-reach 5 $\times$ (Keeper's Obata, Lyra's "one step away", the sphere rescue, the corpus Obata citation, the over-determination temptation) before any became a false credential. This ledger reflects the CORRECTED state.

BANKED (real, at tier)

- QM 10/10 — Derived, ship-ready (venue = Casey's call).
- DE SIGN: $w_a > 0$, no $w=-1$ crossing — theorem-locked (Bernstein / complete-monotonicity of the positive mode-bleed). Structural; the day's hardest DE result.
- DE survives the RADIAL BAO — real DESI DR2 data (Table 4, source-verified): residuals $\chi^2/\text{dof} = 1.0$, max 1.3σ , no flip/trend. BST's no-crossing NOT falsified on the most direct $H(z)$ probe.
- Emergent spacetime $\text{dim} = N_c + 1 = 4$ — target-innocent (Elie, degeneracy-checked).
- $\sin^2\theta_W = 3/13 \rightarrow \text{PD}$ (parity-forced shape; normalization owed).
- #79 REDUCED to the K943 minimality audit — the c-theorem forces the descent (direction+endpoint+path) GIVEN the geometry, at I-tier (Cal's 3 conditions: cond-2 clean = charge-count 137 not Wyler; cond-1,3 I-tier). So the whole frontier is now ONE question: is D_{IV}^5 forced (K943, CONDITIONAL) + the 4-framework convergence evidence line.
- Millennium sector made HONEST for outreach — all "Proof/~95%" reframed to Attempt / topics-for-continued-research, per-problem verdicts, banners + PDFs (clean-repo gate).

CANDIDATE (held, NOT banked)

- DE rate = spectral gap $C_2 = 6$ (the conformal $SO(5,2)$ discrete-series Casimir first eigenvalue) — real value; the = Einstein-constant tie is an UNPROVEN same-value observation (both 6 in BST's convention) — needs Kähler–Einstein / Lichnerowicz–Matsushima, NOT Obata (retracted).
- Homeostat / "relaxing-to-conformal" DE mechanism (Framework) — interior held exact, boundary adjustment fades; = the heat-bleed with interior protected (self-regulating CC resolution).
- CFS map — deeper than "one step away": the naive kernel gives no causal distinction (causality); the open hope is the boundary complex phase (= CP-violation phase) doing the causal job geometry-natively — potential CP+causality unification. Gated; Cal's ceiling holds (continuum-limit, never "forces Einstein").
- Interior/exterior collaboration frame — BST discrete interior + CFS continuous exterior, joined at the boundary; the honest Finster pitch (complementary, not subsumption).

OPEN / FRESH PULLS (next session)

1. #79 core: K943 minimality — is D_{IV}^5 forced? (the one remaining question) + the 4-framework convergence line (BST = MUH + selection).
2. Full DESI test — transverse D_M + CMB (DR2 prefers dynamical DE even w/o SNe; the real test beyond the radial probe).
3. CP-phase map computation — the Finster credential (fresh sitting, occupied-kernel + boundary phase).
4. Obata-parallel for D_{IV}^5 (Casey's intuition, deferred) — the Kähler–Einstein / Lichnerowicz–Matsushima native theorem; would rescue $a_0 \leftrightarrow a_1$ properly if it exists.

RETRACTED today (discipline working)

- Keeper's "DE relaxes at gravity's Einstein-constant rate, by Obata" (Cal caught; Elie killed via degeneracies: $SO(5)\text{-on-}S^4 [1,5,14,30,55] \neq S^6 [1,7,27,77,182]$; the "+5" is the conformal dim). Corpus mis-citation (BST_AC0_Geometry) FIXED.
- Lyra's "map one step away" (self-caught: naive kernel = no causal distinction).

- The sphere rescue (Elie, final no).

Standing (carry forward)

Λ Structural; never “BST derives dark energy / Einstein”; c-charge = K701 count (never Wyler-137); map gated behind outreach vet; clean-repo pass precedes every external step; Casey’s own words held as the Finster note seed. Keeper doesn’t self-pass — Cal audits K1286–K1296. Notes today: K1286 (disambiguation charter) → K1296 (sphere rescue) + this consolidation.

— Keeper, day consolidation, 2026-08-08. Corrected ledger banked for clean pickup.
