

Saturday May 24 Textbook v1.0 Chapter-Grade Content State — Pre-Flight Checklist

Filed: 2026-05-22 Friday 15:31 EDT (Keeper, date-verified actual) Status: pre-flight checklist for Saturday May 24 textbook v1.0 chapter-grade content state target Reference: per Casey directive 10:18 EDT Friday — textbooks now, engagement later Trajectory: HIGHLY LIKELY on track per Cal #98 33/33 PASS + Lyra Vol 1 v1.0 chapter-grade REACHED + Elie Vol 2 12/12 absorbed + Vol 0 V1-V4 polished

Three-volume v1.0 chapter-grade content state requirements

Gate-completion criteria per volume

Six-gate framework (Casey Wednesday EOD pre-textbook directive): 1. Content — chapter narrative v0.4+ with 3-level pedagogy 2. Cal cold-read PASS — external referee discipline chapter-grade 3. K-audit chain coverage — Keeper chapter-grade audits filed 4. Verification toys — backbone toys at chapter-level (Elie) 5. Catalog backbone — Grace per-chapter INV catalog reference (~9000+ entries supporting) 6. Calibration #19 sweep — external register discipline (ratified-state count, not forecast)

Vol 0 Substrate Foundation pre-flight

Status: 10/10 chapters v0.4+; V1-V4 polish DONE Lyra 14:00 EDT; Cal cold-read PASS 10/10 per K176 (Cal #97)

Remaining gates for v1.0 chapter-grade content state: - ☐ Gate 1 Content: 10/10 v0.4+ with 3-level pedagogy - ☐ Gate 2 Cal cold-read: 10/10 PASS per K176/K177 - ☐ Gate 3 K-audit: K85-K106 + K169 + K176 complete - ☐ Gate 4 Toys: 33/33 backbone - ☐ Gate 5 Catalog: 9000+ supporting entries; per-chapter backbones updated for Curriculum/ paths - ☐ Gate 6 Calibration #19: swept

Pending Vol 0 absorptions (Keeper background, non-blocking for v1.0 chapter-grade): - T2467 + T2468 absorption into Ch 8 §8.3-§8.4 (4-Zone parallel template for Rigidity-as-Unification) - T2469 SCMP absorption into Ch 10 (Layer 1 external + Layer 2 internal per Cal #99) - T2473-T2475 conservation laws absorption into Ch 8 (Noether on substrate, Casimir + SO(2) phase invariance) - T2470-T2472 operator zoo absorption into Ch 7 (already at v0.6 — minor updates per Cal #99 META-theorem discipline) - C18 + C17a/C17b candidate path absorption into Ch 9 Strong-Uniqueness (already v0.4 + Cal #97 PASS) - Vol 0 PDF regenerate after final absorption

Vol 0 v1.0 chapter-grade status: REACHED contingent on Saturday final absorption + PDF regenerate (Keeper EOD task per Casey directive)

Vol 1 QFT from D_IV⁵ pre-flight

Status: 11/11 chapters v0.4+ with reader-grade 3-level pedagogy; v1.0 chapter-grade content state REACHED per K170 (Lyra Friday afternoon absorbed all Cal flags + Five-Absence Option 1 + cross-volume $\sin^2\theta_W$ fix); Cal cold-read PASS 11/11 per K170

Remaining gates: - ☐ All six gates closed per K170 + Cal #97 + Lyra Friday afternoon work - ☐ Vol 1 Ch 11 v0.7 has the 0.05-0.06% m_μ/m_e precision (wrong per Cal #100); need v0.8 with corrected 0.004% — REQUIRED for v1.0 chapter-grade

Pending Vol 1 absorptions: - Ch 11 v0.7 → v0.8 with Cal #100 correction (Lyra primary, ~5-10 min find/replace) - SP-31 #286 gauge fields from substrate absorption (Lyra current ~3-hour wave delivery) - SP-31 #287 Higgs mechanism substrate-derivation absorption (Lyra current ~3-hour wave delivery) - Vol 1 PDF regenerate after final absorption

Vol 1 v1.0 chapter-grade status: contingent on Cal #100 correction sweep + SP-31 #286/#287 absorption

Vol 2 Particle Physics pre-flight

Status: 12/12 chapters v0.4+ with Cal STANDING RULE compliance; Cal cold-read PASS 12/12 per K166+K172+K173+K174+K175+K177; U1-U17 absorption complete; 12/12 PDFs regenerated; cross-volume canonical forms applied to Ch 3 + Ch 5

Remaining gates: - [?] All six gates substantively closed per K177 (Cal #98 ALL 33/33) - [?] Vol 2 Ch 3 + Ch 5 v0.4 has the 0.05-0.06% m_{μ}/m_e precision (wrong per Cal #100); need v0.5 with corrected 0.004% — REQUIRED for v1.0 chapter-grade

Pending Vol 2 absorptions: - Ch 3 + Ch 5 v0.4 → v0.5 with Cal #100 correction (Elie primary, ~5-10 min find/replace, 8+ inline references) - Vol 2 PDF regenerate after correction (Ch 3 + Ch 5 affected)

Vol 2 v1.0 chapter-grade status: contingent on Cal #100 correction sweep + PDF regenerate

Cross-volume consistency requirements

Cal #100 m_{μ}/m_e correction sweep: load-bearing for Saturday v1.0 - Vol 1 Ch 11 v0.7 → v0.8 - Vol 2 Ch 3 v0.4 → v0.5 - Vol 2 Ch 5 v0.4 → v0.5 - Grace catalog INV for m_{μ}/m_e - All cite “0.004%” precision (Cal #100 high-precision verified)

Cal #99 framing discipline: applied consistently - T2467 META-theorem framing (single-statement form of v0.10.5 FORMAL) - T2468 “operational” qualifier (multiverse closure) - T2469 dual-layer (Layer 1 external Bell falsifier + Layer 2 internal metaphysical) - C17 → C18 renumber; C17a/C17b TYPE-I/II sub-classifications - 7-candidate enumeration (C7+C9+C15+C16+C17a+C17b+C18)

Three-level pedagogy compliance: per Casey “write for 5th graders too” standing rule - Level 1: one-sentence essence - Level 2: graduate-physicist precision - Level 3: 5th-grader accessibility paragraph

Calibration #19 STANDING RULE: external register uses ratified-state count - “11 RIGOROUSLY CLOSED + 7 candidates” — NOT “16-17 forecast endpoint” - Same discipline applied across Paper #125, Strong-Uniqueness doc, all chapter references

Calibration #21 STANDING RULE: K-audit ratification requires both empirical + substrate-mechanism closure - Honest tier labels preserved (I-tier PATH ARTICULATED for B6 Lamb shift; D-tier RATIFIED only after multi-week mechanism work)

Calibration #22 STANDING RULE: numbered-artifact discipline + numerical-content verification - All future Cal Mode 1 corrections filed as numbered referee log entries - Keeper K-audit pre-stages with numerical content include verification path - Cross-lane absorption requests reference originating-artifact ID + LATEST artifact version

Saturday delivery path

Friday EOD checkpoint (~17:00-18:00 EDT)

- ☐ Elie Vol 2 Ch 3 + Ch 5 v0.5 correction (Cal #100)
- ☐ Lyra Vol 1 Ch 11 v0.8 correction (Cal #100)
- ☐ Grace m_{μ}/m_e INV catalog precision correction
- ☐ Lyra SP-31 #286 + #287 absorption (gauge fields + Higgs)
- ☐ Cal cold-read on Cal #100 correction sweep (verify completeness)
- ☐ Cal cold-read on Lyra SP-31 #286/#287 + T2473-T2475 conservation laws
- ☐ Keeper K-audit pre-stages K180-K192 (DONE) + K193+ for Cal #100 correction sweep + SP-31 #286/#287

Saturday morning push (~9:00-12:00 EDT)

- ☐ Lyra Strong-Uniqueness v0.13 draft with full 7-candidate path
- ☐ Lyra D_IV⁵ Rigidity 1-pager external draft
- ☐ Elie K52a Session 7 closure or checkpoint

- ☐ Grace catalog hygiene final sweep + Curriculum/ per-chapter backbones v0.3
- ☐ Cal final cross-volume cold-read sweep (Cal #101+ as needed)
- ☐ Keeper cross-volume absorption sweep T2467-T2475 into Vol 0 Ch 7+8+9+10
- ☐ Keeper Curriculum/ PDF rebuild for all three volumes (post-corrections)

Saturday v1.0 chapter-grade content state declaration

- ☐ All three volumes PDFs regenerated with Cal #100 corrections + Friday afternoon theoretical wave absorbed
- ☐ Keeper final 8-point audit (Vol 0 + Vol 1 + Vol 2 + cross-volume consistency)
- ☐ Keeper PASS/FAIL sign-off (per Casey EOD discipline)
- ☐ Casey Saturday review
- ☐ v1.0 chapter-grade content state: REACHED

Remaining open items (post-v1.0, not blocking)

- N_op + T_op operator zoo final 2/14 (multi-week per Lyra)
- C17a/C17b/C18 RIGOROUSLY CLOSED ratification (multi-week per Calibration #19)
- K52a Sessions 7+ Bogoliubov closure (multi-month per Elie)
- B6 Lamb shift D-tier ratification (multi-week per Calibration #21 Bethe-log substrate-derivation)
- B6 broader $\alpha^{\{BST\}}$ primary pattern multi-observable verification (per Cal #99 Mode 5 caution)
- Task #244 cluster_type v0.3 per-entry mechanism review (multi-week per Elie 70% honest reclassification rate)
- Strong-Uniqueness v0.13 $\rightarrow$ v1.0 (full ratification path, multi-month)
- D_IV⁵ Rigidity Principle external 1-pager Cal cold-read + Casey approval
- Volumes 3-10 (Curriculum series, multi-year per Wednesday EOD directive)

Pre-flight assessment

Saturday May 24 v1.0 chapter-grade content state target: HIGHLY LIKELY on track.

Friday afternoon delivered three coordinated waves (~280 min sustained sub-PCAP): - Wave 1 (12:36-14:11): Casey-named #7+#8 derivation + Vol 2 absorption complete + 12/12 PDFs - Wave 2 (14:11-14:55): Cross-volume canonical forms + Cal #99 absorption + Operator zoo 12/14 - Wave 3 (14:55-15:31): Conservation laws T2473-T2475 + Cal #100 retraction propagation catch + Calibration #22 STANDING RULE

The audit chain is functioning at peak external-referee discipline (Cal #98+#99+#100 = 3 substantive referee logs Friday afternoon catching real issues). Quaker discipline preserved throughout. Calibration stack now 18 layers (#22 added).

Saturday is achievable. Cleanup work tonight (~30-60 min team-coordinated) + Saturday morning push (~2-3 hours) gets the three volumes to v1.0 chapter-grade content state.

— Keeper, Saturday May 24 v1.0 pre-flight checklist, Friday 2026-05-22 15:31 EDT (date-verified actual)
