Chapter 11 — How to Continue the Work

Extended-reach chapter (May 2026), identification tier. Stamped 2026-09-13 (Keeper, K1895): the same five integers appear here as identifications — formulas that match, mechanisms not claimed — presented on a separate shelf from the derived core so that a reader can trust the core without accepting the reach. Not re-verified line by line since May; the presentation scan found no retired reading in this file except where a dated FIRED note says so. Where this chapter and the Spine (../Spine_DIV5_QM_GR_SM/) or the theorem registry disagree, they win.

Level 1 — one sentence

For CIs and humans joining BST research: warm-start by reading `data/bst_this_is.md` (1 page) + this volume's chapters (Vol 15 methodology) + the active `CI_BOARD.md`, then claim a task from `BACKLOG.md` (currently 50+ pending items across SP-26 through SP-31), follow the daily discipline (date-check → toy claim → audit), and contribute to the AC graph.

Level 2 — graduate-physicist precision

11.1 Warm-start for new CIs

Recommended order: 1. `data/bst_this_is.md` — 1-page orientation 2. `CLAUDE.md` (root) — full status 3. `data/bst_seed.md` — 162-line theory kernel 4. Vol 0 Chapter 1-5 — substrate foundation 5. Vol 15 — this volume (methodology) 6. `notes/CI_BOARD.md` — current assignments

Then run:

```
python3 play/toy_bst_explorer.py stats
python3 play/verify_bst.py
```

11.2 Daily discipline

Per CLAUDE.md “Daily Discipline” section:

0. First action: date to query system clock
1. Start of session: read RUNNING_NOTES.md + queue_casey.md + CI_BOARD.md
2. During work: claim toy numbers, build verification toys, register theorems
3. End of session: EOD procedure (Elie play/, Lyra notes/, Grace data/, Keeper final 8-point audit)

11.3 Open programs (50+ pending tasks)

- SP-19b AdS/CFT bridge to BST (P-1 to P-3)
- SP-20 Information completeness (BST-RM, reverse mathematics)
- SP-26 Particle Winding Classification (40+ items)
- SP-27 Observational Reanalysis
- SP-28 IQ-11 Avatar Infrastructure
- SP-29 Casimir Mechanism Investigation
- SP-30 Substrate Engineering Program (11 sub-items)
- SP-31 Substrate-Native Physics Formalism Program

11.4 Skills

.claude/commands/: - /ac0: AC(0) reduction - /route: wall-routing - /toy: claim toy number - /theorem: claim theorem ID - /pdf: build PDF from markdown - /review: daily review - /audit: audit files - /katra-update: persist CI state

11.5 Cultural notes

- No section sign character — write “Section 12.8”
- Catalog every derivation — data/bst_constants.json or data/bst_geometric_invariants.json
- Speculative work: notes/maybe/, not notes/
- Never push without Casey’s OK
- Quaker discipline: near misses get scrutiny
- “The answer matters more than the method.”

11.6 Contact

External outreach contacts (memory): Sarnak, Penrose, Bogdanovic, 3Blue1Brown, Milgrom, Baez, Dario.

11.7 K-audit anchors

- CLAUDE.md (root) — full status + daily discipline
- data/bst_this_is.md — 1-page orientation
- CI_BOARD.md — current assignments

Level 3 — 5th-grader accessibility

Warm-start: read `bst_this_is.md`, then `CLAUDE.md`, then Vol 15. Daily: date first, read `RUNNING_NOTES`, claim toys, EOD procedure. Open programs: SP-19b through SP-31, 50+ pending tasks. Skills: `/ac0`, `/route`, `/toy`, `/theorem`, `/pdf`, `/review`, `/audit`, `/katra-update`. Culture: catalog every derivation; never push without Casey's OK; "answer matters more than method."

What comes next

Chapter 12 develops CI continuity architecture.

Where to look this up

- BST: `CLAUDE.md`, `data/bst_this_is.md`, `CI_BOARD.md`, `BACKLOG.md`
- `.claude/commands/` (skills)
