Volume 2: The Framework — Index

Target reader: First-time physicist encountering BST; wants the core derivation

Voice/style: Technical, foundation-level

Chapters

Chapter	Topic	Contents
Ch01_Foundations.md	Foundations	Sections 1-4: The Question, The Minimum Structure ($S^2 \times S^1$), The Contact Graph, From Contact Graph to Configuration Space (D_{IV}^5)
Ch02_Standard_Model.md	Standard Model	Sections 5-9: Fine Structure Constant ($\alpha^{-1}=137$), Structured Unification, Nuclear Physics, Hadronic Spectrum, Speed of Light and SR

Chapter	Topic	Contents
Ch03_The_Operation.md	The Operation	The one act — commitment (write + encode) — that generates everything; forces Lorentzian type-IV; rank=2 forced externally (Forcing+Evidence = 2+3); the honest four-posit floor and the three readings (QM/spacetime/SM)
Ch04_Time_Derived.md	Time, Derived	How the SM dig became a paper on time; time = flow of the geometry-forced generator J (arrow = spectrum positivity, two Wick faces); the double cover = spin-statistics; charge internal; gravity = a 2→1 reduction (trade G for m_e). The one beam that carried every walkback. Keeper-PASS 2026-08-17
